

## The Keystone KapStone™ Advantage

### Affordability

Keystone KapStones provide an attractive pyramid peaked column cap for a much lower cost than most competitive products, such as quarried stone.

### Aesthetics

Keystone KapStones contain natural aggregates, helping to create the authentic textures of limestone, granite or flagstone.

### Ease of Handling

Keystone KapStones are light enough to be easily maneuvered by one person. A quarried stone column cap can weigh several hundred pounds, making it extremely difficult to lift and position on a column.

### Color Options

Keystone KapStones are available in a variety of popular colors, making it easy to select the perfect wall accent.

### Durability

Keystone KapStones are built to withstand the elements and the test of time. Constructed of a high-strength polymer, Keystone KapStones are resistant to fading and chipping.

The *finishing* TOUCH!

ANOTHER QUALITY PRODUCT FROM:

# Keystone KapStone™ FEATURES

Add the perfect *finishing* touch to your Keystone wall project with Keystone KapStones™. Keystone KapStones are peaked column caps that have the natural beauty and durability of cut stone, without the heaviness or high cost.

Keystone KapStones deliver the same ridges, clefting and authentic textures of granite, limestone or flagstone. The 24" x 24" Keystone KapStone fits over the 20" x 20" Keystone Country Manor® column, masking the top of wall joints and leaving a clean finished look. Keystone KapStones can also be utilized with other columns of a comparable size.

## Color Options

Keystone KapStones are available in the most popular wall colors, making it easy for you to incorporate them into your project.

Tan Sandstone (KPST24-03)  
24" x 24" x 4.5"

White Granite (KPST24-01)  
24" x 24" x 4.5"

Gray Limestone (KPST24-02)  
24" x 24" x 4.5"

Blue Stone (KPST24-04)  
24" x 24" x 4.5"

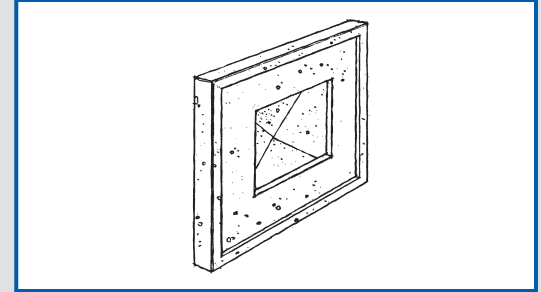

INSTALLATION AS EASY AS 1-2-3

### 1. PREPARE THE COLUMN FOR CAPPING

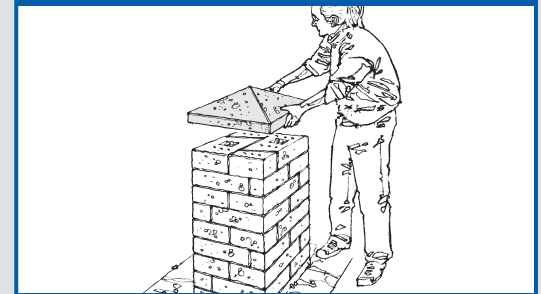

Make sure the column top is dry and free of dust or other debris. Take this opportunity to confirm that the column is square and level.

### 2. APPLY ADHESIVE

Turn the Keystone KapStone upside down and apply the specially formulated Keystone KapSeal™ (or a comparable specialty formula of construction adhesive) to the square recessed area on the underside of the cap. Apply the adhesive in a 1/4 inch bead, making sure that the bead will make good contact with each unit in the top course of the column.

### 3. PLACE CAP

Holding the Keystone KapStone upright, place the cap on the column. Twist the cap back and forth slightly to insure a good adhesive bond. Measure for square and center on the column. Check for visible adhesive. Follow the directions on the adhesive packaging for clean up and drying time.
